CORPORATE COMPLIANCE PROGRAM

Revised 4.24.2019

I. INTRODUCTION

It is the policy of HCRS to comply fully with all applicable federal and state laws and regulations through the HCRS Standards of Conduct, the HCRS Policy on Ethical Behavior, and recognized principles of business and healthcare ethics. To that end, we have developed this Compliance Plan.

This plan explains HCRS' basic values and expectations for professional behavior of its employees. While we could not possibly anticipate every problem or dilemma our employees may encounter, this plan, together with the management and resources of HCRS' administration, Human Resources, the Clinical Standards Committee, the Compliance Officer, and division directors and managers, shall help to guide employees in making difficult decisions.

HCRS has designated a Compliance Officer and the Clinical Standards Committee to oversee and coordinate HCRS' efforts to abide by the principles set forth in this Compliance Plan. The Compliance Officer shall report on the status of HCRS' efforts directly to the Board of Directors and senior management.

This Compliance Plan shall be updated and revised from time to time to stay current with both internal and external changes.

Compliance with HCRS' Standards of Conduct and Policy on Ethical Behavior is a condition of employment at HCRS. Any employee who fails to meet the Standards of Conduct as explained in this document, or the Policy on Ethical Behavior, and any manager or supervisor who attempts to retaliate against or dissuade a subordinate from raising questions, will be subject to discipline up to and including dismissal. We are confident that working together, we will achieve the goals set forth in this plan.

II. STANDARDS OF CONDUCT
